If you are a health professional who works with older adults, this five-week online course will help you to acquire the knowledge and skills needed to apply an evidence-based approach to the prevention of falls and fall-related injuries. Through online, instructor-facilitated learning modules you will:

- study four to six hours per week
- learn how to design, implement and evaluate a fall prevention program

Upon course completion you should be able to:

- define the scope and nature of the problem of falls
- provide fall risk identification and assessment
- employ a selection of prevention interventions reflecting evidence-based strategies
- understand social policy and context
- provide application of a program planning model
- evaluate the effectiveness of a fall prevention program

*The CFPC is an evaluated course, developed by a team of experts in fall prevention, adult education and clinical practice under the leadership of Dr. Vicky Scott, with funding provided by the Public Health Agency of Canada, Population Health Fund.*

**Dates:** Jan. 17 - Feb. 21, 2020
